Services

Payment of the annual subscription fee entitles an agency to access the system and all of the support services provided by CapWIN including software maintenance, upgrades, training, and access to the 24/7 help desk.

Policies

1. The fee category for an agency will be based on a good faith estimate by the agency for the upcoming fiscal year.
2. Full deployment can take place at any time upon execution of a Memorandum of Agreement and upon completion of the required training for the proposed users and/or the in-house trainer.¹
3. Payment will begin as soon after deployment as an agency can incorporate the fee into its fiscal year budget cycle.

¹ **Note:** The system and all support services can be made available to an agency on a temporary basis for testing and evaluation without cost or obligation. It will only be necessary for a user to complete the training before using the system.
